The MAIL Period for Reply	ING DATE of this commur	nication appears on t	he cover sheet with	the correspondence a	ddress		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8, 9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 08105407 to **Tokai**.

The **Tokai** reference discloses a hydraulic cylinder (1) including a cylinder chamber, a piston head (3) within the cylinder chamber forming two sub chambers on each side of the piston head, and a piston rod (2) which runs from one side of the piston head through at least one of the sub chambers wherein a hydraulic power unit (4-7) for the operation of the hydraulic cylinder is situated partly within the parts forming at least one of the piston head and piston rod, as recited in claim 8. The rod runs through both sub chambers, as recited in claim 9. One of the piston rod and piston head comprises a hydraulic pump in the form of pistons (4, 5) for the hydraulic cylinder, as recited in claim 11.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 4,854,384 to **Campbell** in view of **Tokai**.

The patent to **Campbell** discloses a plug for closing off a pipeline (12) comprising anchoring (26) and sealing means (24) for anchoring and sealing against the internal wall of a pipeline which are operated by at least one hydraulic cylinder comprising a cylinder and chamber (70), a piston head (72), situated within the chamber and dividing the chamber into two sub chambers and piston rod (76) which runs through the piston head and through at least one of the sub chambers on either side of chamber (70). It is disclosed that pump and valve are activated by a remote control switch when it is desired to initiate the gripping and sealing action, causing the piston to be moved in one direction and when the opposite action is to take effect, the remote control switch activates pump and reverses solenoid valve so that the hydraulic fluid can drain from the high pressure side. **Campbell** does not disclose the hydraulic power unit being provided partly within the piston head. **Tokai**, as

Application/Control Number: 10/531,739

Art Unit: 3754

Page 4

discussed previously, provides a hydraulic cylinder (1) comprising a cylinder chamber, a piston head (3) within the cylinder chamber forming two sub chambers of the cylinder chamber, one on each side of the piston head and a piston rod (2) which runs from one side of the piston head through at least one of the sub chambers. It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute for the hydraulic cylinder arrangement of **Campbell** to one having the power unit for its operation at least partially within the head, as suggested by **Tokai** in order to provide for a self-contained plug for plugging pipelines.

Response to Amendment

3. Applicant argues that the **Gentzsch** reference does not disclose the power unit being situated within the parts forming the piston head and rod and therefore will not move with the piston head and rod as they move within the chamber relative to the housing. The rejection to **Gentzsch** has been withdrawn, however the **Tokai** reference discloses a housing including a piston (3) which has within it a hydraulic power unit that functions to move the piston (3) and will move with the piston head and rod as they move within the chamber relative to the housing.

Allowable Subject Matter

4. Claims 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
